

SURESH KUMAR

Software Engineer (Full Stack) | Node.js · NestJS · React · Next.js · React Native · TypeScript
Chennai, Tamil Nadu | +91 8015512700 | sureshkumarbe04@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer (Full Stack) with 3.5+ years building production web and mobile apps with NestJS, Node.js, React, Next.js and React Native. Built an entire NestJS backend single-handedly, integrated Stripe subscriptions and real-time Socket.io features, and added BullMQ email queuing to Queensland Government-listed trust account software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Backend: Node.js, NestJS, GraphQL, RESTful APIs, WebSocket (Socket.io), Webhooks, BullMQ (job queues)

Frontend: React.js, Next.js, Redux, Context API

Mobile: React Native (cross-platform)

Databases & ORM: PostgreSQL, MongoDB, TypeORM

Integrations: Stripe (subscriptions), Mailgun (transactional email), third-party REST APIs

Tools & Practices: Git, TFS, CI/CD (Jenkins), Postman, Agile (daily stand-ups)

PROFESSIONAL EXPERIENCE

CubeMatch Technologies Pvt. Ltd.

Mar 2024 – Present

Software Engineer (Feb 2026 – Present) · Junior Software Engineer (Mar 2024 – Feb 2026)

- Build and maintain full-stack features across NestJS backends, Next.js web frontends and React Native mobile apps for two client products in an Agile team with daily stand-ups, translating business requirements into production functionality; promoted to Software Engineer in Feb 2026.
- Designed and implemented the data exchange layer between frontend and backend systems over GraphQL and REST, enabling reliable transmission and retrieval of application data across web and mobile clients.
- Deployed application releases through Jenkins CI/CD pipelines.
- Created reusable, responsive UI components shared across screens and features to deliver consistent, intuitive user experiences.

Project: Paytrade-SSS

Application to track site work progress and employee status · Team of 3.

Tech: NestJS, PostgreSQL, TypeORM, Socket.io, Stripe, Mailgun, React Native

- Owned the complete NestJS backend as the sole backend engineer, building 13+ modules including user, company, project, timesheet, task, incident reporting, RAMS, drawings and role management, with PostgreSQL/TypeORM persistence and third-party integrations.
- Integrated Stripe subscription billing with automatic renewals, and implemented webhook handlers for Stripe and Mailgun events to keep subscription and email status in sync with the application.
- Implemented real-time features with WebSocket (Socket.io), including live user location tracking and instant check-in / check-out notifications.
- Implemented a support ticket system with automated Mailgun email notifications.
- Contributed to the React Native frontend, building selected screens and integrating them with backend APIs using Redux / Context API state management.

Project: PayTrade (Australia)

Audit-first, Xero-connected project trust account software for Queensland construction businesses, used by builders, contractors, bookkeepers, accountants and auditors; listed on the Queensland Government's assessed trust account software solutions page.

Tech: NestJS, GraphQL, PostgreSQL, TypeORM, Next.js, Mailgun, BullMQ

- Engineered audit reporting functionality that tracks and logs system and process changes, contributing to the product's audit-ready trail for review by accountants, auditors and the QBCC.
- Delivered an end-to-end support ticket system with automated email notifications via Mailgun.
- Introduced a BullMQ job queue for outbound email that tracks delivery status and automatically resends emails that fail or hit provider sending limits, preventing lost notifications.

Junior Software Engineer

- Integrated multiple third-party APIs, configuring endpoints and handling data format mapping to improve system reliability and performance.
- Partnered with UX/UI designers to turn design concepts into functional, responsive web and mobile interfaces.
- Awarded **"Rookie of the Year"** for outstanding performance in the first year.

Project: ITAS – Transport Appointment Booking System

Mobile application for truck drivers and transport companies to schedule appointments and manage trouble tickets.

Tech: React Native, RESTful APIs

- Delivered the complete React Native app as the sole mobile developer, building all modules, including truck appointment scheduling and trouble-ticket handling.
- Integrated RESTful APIs to connect the mobile app with backend services, managing data retrieval and updates across the appointment-booking and trouble-ticket workflows.

Project: Hire Programmers

Freelancer hiring platform connecting clients who post projects with freelancers who apply · Team of 4.

Tech: Next.js, NestJS, MongoDB, Socket.io

- Developed full-stack features end to end across the Next.js frontend and NestJS backend, covering project posting, search and filtering, and user profiles.
- Implemented a real-time in-app messenger between clients and freelancers using Socket.io.
- Created Next.js pages for project listing, project details, profiles and messaging, backed by NestJS APIs on MongoDB.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

2018 – 2022

AVS College of Technology · CGPA: 7.9
